City: Brest, Minsk, Grodno, Belarus

## Summary

I'm a Frontend (js, ts) developer with main focus in React. I have a good knowledge of professional software engineering practices including coding standards, code reviews, source control management, and unit testing.

I'm a communicative, self-confident, punctual, ambitious, motivated, stress-resistant person, who can easily work with a team.

Besides work, I have hobbies like reading, fishing and playing with my cat. I always try to learn something new, because it can never be enough.

My main goal as a developer is to grow up to Lead position or become a Team Lead. I want to take part in unusual and challenging projects in any fields. I really like to increase my professional level and I want my new project to help me with that.

## Education

Grodno state college of Technique, Technologies, and Design. **Software for Information Technology**. 2017-2021(honor degree)

## Languages

**English** – B1;

**Russian** – Native.

# Working experience

## Face recognition system for the Educational Institutions

### Description

App to optimize student time during class. The application allowed the data of students and teachers to be added to the database, after which they could be recognized. For recognition, it was necessary to select the necessary ones from the list of all available cameras and start the recognition process. The recognition results can be seen through the web application and also on the server where the application is installed in the application itself
